PROFESSIONAL EXPERIENCE

Power Platform / SharePoint Developer | Shoreline Bioscience

December 2021 - June 2026

- Delivered Microsoft Power Platform and SharePoint solutions using Power Apps, Power Automate, Power BI, SharePoint, and Microsoft Teams.
- Designed and developed Power Apps solutions to support business processes and improve operational efficiency.
- Built Power Automate workflows for approvals, notifications, conditional routing, status updates, and business process automation.
- Modernized legacy SharePoint business processes by converting InfoPath forms and SharePoint Designer workflows to Power Apps and Power Automate.
- Re-created and converted Nintex workflow logic in Power Automate, including approvals, conditional routing, notifications, SharePoint item updates, and workflow testing.
- Supported SharePoint Online and On-Premises solutions, including lists, libraries, permissions, content organization, and user support.
- Collaborated with business users to gather requirements, troubleshoot issues, and deliver solutions aligned with operational needs.

Power Apps / Power BI Developer | IDS

September 2019 - November 2021

- Developed Canvas and Model-Driven Power Apps to support structured business processes and data management.
- Designed and developed SSIS ETL processes to extract data from multiple sources and load SQL Server data warehouses.
- Designed and developed SharePoint sites to support Power Apps and Power BI solutions.
- Developed Power Apps solutions that streamlined business processes and improved productivity.
- Built SSAS data models to support business intelligence reporting and analytics.
- Created interactive Power BI dashboards and reports to visualize data and provide actionable insights to stakeholders.
- Collaborated with business users to gather requirements and translate business needs into technical solutions.

SELECTED TECHNICAL PROJECTS

Enterprise Laboratory Request Management System

Power Apps | Dataverse | Power Automate | SharePoint | SPFx

- Designed an enterprise request-management data model with Dataverse tables, relationships, global choices, approval fields, technician assignment, and work-status tracking.

- Designed multi-stage workflow automation for request submission, manager and supervisor approvals, technician assignment, notifications, and completion tracking.
- Developed a SharePoint Framework dashboard using React and TypeScript for a customized laboratory operations experience.

SharePoint Workflow Modernization & Migration

SharePoint Online | Power Automate | Nintex | InfoPath | ShareGate

- Modeled a modernization approach for legacy SharePoint processes, including workflow inventory, dependency assessment, migration planning, testing, and cutover.
- Mapped legacy Nintex and SharePoint workflow patterns to Power Automate actions for approvals, conditions, notifications, updates, and exception handling.

EDUCATION

Bachelor of Computer Science | Mekelle University, Ethiopia | June 2001

Associate in Arts in Accounting | Gondar University, Ethiopia | June 1997
